# Jackson Lawrence

San Francisco, CA | jlawrence1787@gmail.com | jlawrence.io

Software engineer who builds AI agents and full-stack web and mobile products, starting from the people who'll use them. Skilled in multi-agent orchestration, RAG and design thinking.

## EXPERIENCE

**Oracle** | *Software Engineer* Redwood Shores, CA | **June 2025 - Present**

- Architected an agentic workflow builder adopted by multiple customers, handling thousands of Gen AI chats daily
- Developed and deployed an OCR + RAG pipeline that ingested over 2 million documents in less than a month
- Partnered with multiple teams to deliver AI agent to human agent handoff for production support chat
- Own full-stack projects end to end on a small R&D team, from design through production deployment

**Oracle** | *Software Engineer Intern (x2)* Redwood Shores, CA | **Summers 2023 & 2024**

- Developed and deployed a Helidon MP Microservice featuring CRUD endpoints to upload documents for RAG
- Designed a type-safe way for an existing Oracle JET Knockout project to manage global state with 30+ variables
- Automated testing for over 90% of scenarios in a REST microservice that supports LLM queries and file uploads
- Developed new features for internal and consumer-facing applications used in the Oracle Health LOB

**Trailblaze** | *Co-Founder & CTO* Boston, MA | **January 2021 - April 2024**

- Developed screens, services, and database architecture for a job-recruiting mobile app in React Native
- Launched and grew mobile app to over 10,000 users in less than one year
- Designed and developed our company's public-facing website using Next.js

**CareerFoundry** | *Web Development Instructor* Remote, US | **July 2022 - May 2023**

- Taught new students in the industry to develop full-stack web applications
- Provided groups of students with feedback on projects within 24 hours of submission
- Collaborated with course mentors to provide students with careers in the web development industry

**KoiStream** | *Director & Full-Stack Developer* Redwood Shores, CA | **March 2020 - June 2021**

- Developed a live streaming platform with viewing, chatting, and moderation capabilities
- Delivered HD video stream through the use of FFmpeg, AWS MediaLive, and Amazon CloudFront
- Constructed a full-fledged broadcasting studio on campus with high-grade production equipment

## EDUCATION

**Northeastern University** | BS *Computer Science and Business (Fintech concentration)* Boston, MA | **June 2025**
**Khoury College of Computer Sciences**

Related Courses: Software Engineering | Algorithmic Trading | Data Science Fundamentals | Object-Oriented Design | Algorithms and Data | Fundamentals of Computer Science 1 & 2 | Intro to Web Development | Discrete Structures | Foundations of Cybersecurity

## SKILLS

| | |
|---|---|
| **Languages:** | TypeScript \| JavaScript \| Go \| Java \| Python \| SQL \| GraphQL \| HTML \| CSS |
| **AI:** | Prompt Engineering \| Multi-Agent Orchestration \| RAG \| Embeddings \| Vector DBs \| LangChain \| LangGraph \| Claude Code \| Codex |
| **Frameworks:** | React \| React Native \| SwiftUI \| Next.js \| Node.js \| Express \| Tailwind CSS \| Helidon \| Oracle JET \| Jest |
| **Tools:** | OCI \| Oracle 26ai Database \| PostgreSQL \| AWS \| Terraform \| Kubernetes \| Git \| Playwright \| Figma |
| **Concepts:** | REST APIs \| Server-Side Rendering \| UI/UX \| Design Thinking \| Root Cause Analysis \| Agile |
